

Synchronize MY Space

12 Universal Laws

The 12 universal laws are thought to be intrinsic, unchanging laws of our universe that ancient cultures have always intuitively known. By choosing to live your life and reminding yourself of these universal laws that affect all, you will have better understanding of that we call life. By synchronizing your space, you will be able to raise your vibration, to get into a rhythm to take action to manifest what you truly want.

1. The Law of Devine Oneness

The law of divine oneness is the MVP of the universal laws, in that it's the one upon which all the others build. This law states that we are all connected through creation.

2. The Law of Vibration

Everything in the universe has a frequency and a vibration. Nothing ever stands still, as everything is always either being pushed away or pulled toward something. Furthermore, items of a similar vibration are attracted to each other. So, to use this law to manifest your desires, you must match your vibration with that of what you want.

3. The Law of Correspondence

The premise behind the law of correspondence is that our lives are created by the subconscious patterns we repeat every single day, and these patterns either serve us or hold us back. Activate this law by becoming aware of your own patterns, which are often passed down via family ties, and then consciously taking action steps to break them.

4. The Law of Attraction

This is essentially the law of vibration in action," Wilder says. "Many people get scared by the notion that bad thoughts or low vibrations can somehow destroy their life because they're unaware. The law is not a punishment, but a very clear mirror of our self-worth and mind-set. You're surrounded by the outcome of decisions you've made in the past and are fully capable of making other decisions and attracting a different set of circumstances in the present and future.

5. The Law of Rhythm

The Law of Rhythm states that everything is like a pendulum. Whenever something swings to the right, it must then swing to the left. Everything is involved with a dance..... A swaying back and forth. Everything is either growing or dying

6. The Law of Cause and Effect

The law of cause and effect, also known as the law of karma, states that any action causes a reaction, whatever you put out—good or bad—you get right back. To harness the power of this law, be aware of how your actions and decisions are affecting not just yourself but everyone around you, and focus on dismissing negative energy in favor of positivity

7. The Law of Action

While the law of attraction is about vibrationally aligning yourself with whatever it is you want, the law of inspired action is about taking—you guessed it—action in order to bring what you want to fruition. Taking physical steps to move yourself closer to your vision is much more crucial.

8. The Law of Gender

This law often expresses itself in the discussion of Yin/Yang. All things exist as inseparable and contradictory opposites or as Law of Polarity expressed, one topic, same pole. Everything has a masculine and feminine energy.

9. The Law of Compensation

The law of compensation is about reaping what you sow. "It instills trust in us that we will be compensated for our work as long as we're open to receiving it in all the many ways that the universe can deliver,"

10. The Law of Perpetual Transmutation of Energy

This law means that even the smallest action can have a profound effect, like the seed of a mighty tree holds all its promise in its tiny shell, you also have the power within you to move mountains.

11. The Law of Relativity

Everything is a spectrum of expression, and there is more than one perspective on any situation or challenge, therefore nothing and no one is inherently good or bad. In other words, we are the ones who assign meaning to things, so we can choose to regard things as "bad," or, alternatively, as happening in our favor

12. The Law of Polarity

Everything in the universe has a polar opposite: If there's an up, there's a down. If there's light, there's dark. One cannot exist without the other. Experiencing these polarities is part of the human experience, and that they also help us learn from our mistakes and support us in identifying what we don't want, so we can gain clarity surrounding what we *do* want
